

BITE POWER

Crocs have enormously powerful jaws.

🦏 A 4.5m croc bites with 45 times more force than a human, over **6 times harder than a great white shark** and almost 4 times harder than a hyena - the equivalent of having a Toyota Hilux dropped on your foot.

🦏 A 5.2 m croc bites almost twice as hard as the 4.5m croc and 25% harder than we estimate *Tyrannosaurus rex* would have bitten - being the equivalent to a 3.5 tonne diesel truck dropping on your foot.

🦏 Just imagine how hard the bite of the 35 foot long *Alligatorid deinosuchus* (long extinct) would have been - **probably the strongest bite of any animal that ever existed on earth.**
