Estuarine Crocodile
Crocodylus porosus

Two species of crocodylians are found in Australia – the Saltwater or Estuarine Crocodile (*Crocodylus porosus*) and the Freshwater Crocodile (*Crocodylus johnstoni*).

The estuarine croc is much larger and is found in saltwater habitats as well as freshwater. The freshwater crocodile lives only in fresh water. The Estuarine Croc is also found in SE Asia, India and around the western pacific islands.

Fresh Water Crocodile
Crocodylus johnstoni
